

SHELL RACING FUEL GTS

Shell Racing Solutions

The power driving motorsport

Application

Shell Racing Fuel GTS is a special unleaded racing fuel for use in GT and Formula racing. Shell Racing Fuel GTS complies with the relevant FIA regulations.

Comments for Use

Shell Racing Fuel GTS should be stored in closed preferably full fuel containers under dry and cool conditions to maintain maximum performance potential.

Characteristics

Shell Racing Fuel GTS has been developed to give maximum performance in high revving four stroke engines. Due to its formulation and high octane ratings it can be used in a wide range of applications including both naturally aspirated (atmospheric) and turbo charged engines. Shell Racing Fuel GTS includes tailor made additive technology to ensure clean combustion and minimizes the formation of deposits in the inlet system and combustion chamber.
